Motor yacht Bering 80 by Bering Yachts

January 13, 2014

[Motor yacht Bering 80](#) is part of the Yachtship Series of motoryachts, developed by [Bering Yachts](#). This series mixes up all of the seakeeping abilities of the Expedition series, while bringing a modern 'contemporary' look and feel to the design.

Superyacht Bering 80 would be rightfully classified by many as an 'expedition yacht' given her impressive capabilities. This heavy displacement motoryacht, whose hull form takes design cues from the proven ocean going commercial trawler, excels in the areas that matter most: a sea-kindly motion in heavy weather, reliability and ultimate seaworthiness of design.

Beyond using a proven hull design, the entire Bering line relies on a 'heavy for size' approach to providing the uncommon sea-kindly motion that very few if any recreational motoryachts are capable of delivering. A carefully designed low center of gravity combined with the sheer mass of the vessel provides a reduction in roll moment and minimized pitching and pounding that so many find unpleasant. This 'heavy for size' approach is well proven in the commercial marine market where vessel 'weight' is really how one defines a vessel's size as opposed to length. Note that the Bering 80 yacht displaces 450,000 pounds at full load which is significantly more than her competitors!

While at sea, one's peace of mind is of utmost importance, which is why in addition to the hull & structural design Bering puts great emphasis on the reliability & durability of their motoryachts. The strict use of only commercially rated and internationally sourced equipment on board ensures you will have minimal equipment related problems, and in the rare case that you do, parts will be readily available regardless of your locale.

A semi-custom build approach allows for true customization of the interior layout and appointments. Luxury yacht Bering 80 can be configured in a variety of different ways depending on your particular desires. The accompanying layout renderings show just several of the options available to you. As an option, the master stateroom can be located forward on the main deck level to provide maximum privacy from the guest staterooms below. Private guest staterooms can be configured however you like based on your desire for company while aboard. If you wish to have dedicated crew aboard then separate crew quarters can be configured into the layout as well.

The Bering 80 yacht offers her owners a wonderful platform by which to cruise, especially for extended times exploring coastlines or making longer passages. With tanks holding 10000 gallons of fuel, there really is no port out of your reach. Travelling at efficient passagemaking speeds of around 8-10 knots your range is in excess of 6,000 nautical miles. Should your plans not call for such distant voyages then you have the peace of mind knowing that a full load of fuel will last many months of coastal cruising. Likewise, 1,000 gallons of fresh water capacity ensures a high quality of life, allowing extended hot water showers without guilt as well as not having to run a watermaker so frequently. The Bering 80 superyacht really is a cruisers delight!
