

## Bering Yachts News

---

### **New Bering 65 is launched**

Bering Yachts is proud to announce the launch of 65 hull no. #2 at the yard in Zhangjiang, China. Modeled after proven North Atlantic commercial trawlers, her heavy full-displacement hull is ideally suited for the rigors of open ocean travel. The design of the raised pilothouse is rooted in tradition but also highly functional and has become a hallmark of expedition yachts in this class. With efficient, commercially-rated diesel engines and voluminous fuel tanks, she can easily travel 5,000 nautical miles at 6-7 knots without the need for refueling. The interior floor plan of the 65 includes three spacious staterooms, each with its own private ensuite head, and a crew quarters for two.

The interior varnish of American Ash reflect the owners' wishes, as does the custom-installed teak flooring, an extensive Furuno electronic package and Seakeeper M35 Gyro Stabilizer.

B 65 will undergo extensive sea trials in the South China Sea later this month and will be delivered to her owner on May 15th.

## Participation in the Shanghai Boat Show

Bering participated in the 20th China (Shanghai) International Boat Show at the Shanghai World Expo Exhibition & Convention Center from April 9 to 12, 2015.

This year's Shanghai Boat Show was one of the most popular shows in China. The Asian markets inspired the company representatives to reinforce its development strategy in the area of Southeast Asia.
